

# SonicWALL Next Generation Firewalls

NSA Series

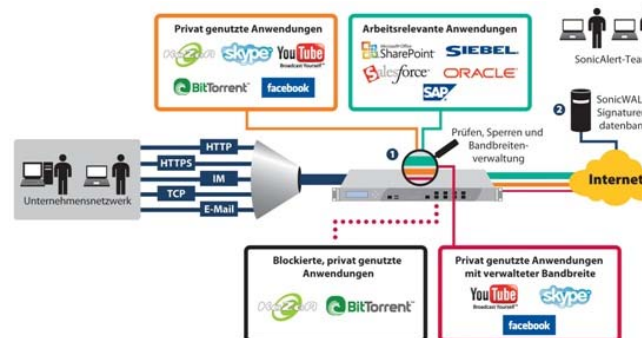

TZ Series

NSA E-Class Series

## 15 reasons why you should switch now to SonicWALL firewalls ...

## 15 good reasons to switch

**1**

High availability at an attractive price

**6**

Deep packet inspection – even for  
SSL-encrypted traffic

**11**

Multicore architecture in NSA Series and  
higher

**2**

Full UTM performances plus Application  
Intelligence

**7**

Worldwide manageability via GMS

**12**

Low power consumption and load

**3**

Visualization with real-time monitoring of  
active network applications

**8**

Active/active UTM

**13**

All firewalls have “unrestricted nodes”

**4**

Email security on UTM  
(anti-spam, anti-phishing, anti-email viruses)

**9**

High-level security and performance; real-  
time packet scanning

**14**

All appliances feature uniform, user-  
friendly interface

**5**

SSL-VPN and IPSec VPN

**10**

UMTS/analog modem failover/operation

**15**

802.11n WLAN with the TZ Series and  
access points for the TZ and NSA Series

## Closer look at the reasons ...

- 1 **High availability** for almost all UTM firewalls. Starting with the TZ 200, appliances can be clustered at a very attractive price point.
- 2 The firewall uses **Application Intelligence**<sup>1</sup> to detect Internet applications and services that must be blocked or restricted.
- 3 **Visualization**<sup>1</sup> **functionality** enables the data stream to be filtered graphically in real time to monitor applications, users and domains.
- 4 The **firewall** needs no extra hardware to protect against **spam, phishing and email viruses**<sup>2</sup>.
- 5 **SSL-VPN**<sup>3</sup> or **IPSec VPN** give mobile users easy, convenient and cost-effective access to the corporate network.
- 6 **Deep packet inspection**<sup>4</sup> even finds dangerous code in **SSL-encrypted data traffic**.
- 7 The **Global Management System (GMS)**<sup>5</sup> enables all SonicWALL products worldwide to be centrally managed with graphical reporting functionality.
- 8 **Active/active UTM**<sup>6</sup> permits UTM services to be distributed across two appliances in a high-availability cluster.
- 9 **High-level security and performance** through patented RFDPI technology<sup>1</sup>, which allows data packets to be inspected **in real time** without caching.
- 10 Almost all current firewalls can be enhanced with **a USB UMTS** and/or **a USB analog modem**<sup>7</sup>, which can be configured to run as a regular UMTS/analog modem or as a failover option in the event of DSL outage, etc.
- 11 **Multicore architecture as of the NSA Series** guarantees **very good performance**.
- 12 This architecture also keeps the **processing load, power consumption** and **heat buildup** at a very **low** level.
- 13 All UTM firewalls support an **unlimited number of appliances (nodes)** with firewall-enabled Internet access.
- 14 All UTM firewalls also come with a **uniform, user-friendly interface**.
- 15 The TZ series can also be operated over a WLAN. Appliances without integrated WLAN functionality (TZ and NSA) can be wireless-enabled using SonicPoint access points. The **TZ Series with WLAN and SonicPoints** already support the latest **802.11n**.

### Notes:

- 1 This requires a valid Gateway-Antivirus, Intrusion Prevention and AntiSpyware (GAV/IPS) subscription. TZ 210 and higher appliances are designed to support application intelligence and visualization.
- 2 This function requires a Comprehensive AntiSpam (CASS) subscription.
- 3 Some licenses are already included and additional licenses can be added as needed.
- 4 Available in NSA 3500 and higher using an add-on license. Included in NSA E8500.
- 5 Separate licenses must be purchased for GMS.
- 6 Only available in the NSA E-Class Series with an additional license.
- 7 Applies to all UTM firewalls except TZ 100 and NSA 2400.

## How can I switch cost-effectively to a SonicWALL Next Generation Firewall?

Simply upgrade your existing solution under one of our Secure Upgrade packages. The Secure Upgrade packages include firewalls (hardware), security services (Gateway Anti-Virus, Intrusion Prevention, Anti-Spyware and Content Filter Premium), as well as 24x7 support for either two or three years. Essentially, you only pay for support and services – the hardware is free.

The list below shows you what competitor products are eligible for trade-in. If your product is not included in the list, please contact us to find out if it is eligible.

**If you purchase any other SonicWALL solutions at the same time, you will be eligible to the SonicWALL Customer Loyalty Bundle Program**

Eligible Legacy UTM Appliances	Replacement Products
TZ 150, TZ 150W, TZ 170, TZ 170W, TZ 170 SP, TZ 170 SPW, TZ 180, TZ 180W, TZ 190, TZ 190W, PRO 100, SOHO Telecommuter, SOHO, SOHO2, SOHO3, SOHO TZW, SonicWALL DMZ, XPRS, XPRS2, SonicWALL Plus, TELE, TELE2, TELE3, TELE3 SP	TZ 200 Serie, TZ 210 Serie, NSA 240
PRO, PRO 200, PRO 230, PRO 1260, PRO 2040	NSA 240, NSA 2400, NSA 2400MX, NSA 3500
PRO-VX, PRO 300, PRO 330, PRO 3060, GX250	NSA 3500, NSA 4500
PRO 4060, PRO 4100, PRO 5060c, PRO 5060f, GX650	NSA 4500, NSA E5500, NSA E6500, NSA E7500
