

RM-NS1000

Easy-to-use System Controller

An optional RM-NS1000 System Controller - which connects to the NSR-1000 Series or a client PC via USB cable - allows the user to control multiple servers and cameras. A wide range of operations can be performed from this unit, including camera selection, Pan/ Tilt/Zoom (PTZ) with preset

controls, snapshot capturing, video exporting, and event search and playback.

Equipped with a three-axis joystick with a mouse emulator, three-line LCD, and feature-rich control panel, the RM-NS1000 is the ideal tool for easy operation of your system.
