- Improved noise canceling
- Break-proof FreeSpin boom with 360-degree-plus rotation
- Surgical steel for maximum strength
- Ultra-strong Kevlar-reinforced cord
- Supersoft ear cushions
- Clothing clip with ID tag
- 3-Year warranty

The Jabra BIZ 2400 IP headsets are the wideband members in the comprehensive family of Jabra BIZ 2400 high-end corded headsets from GN Netcom. These particular units are configured for IP telephony, where calls are transmitted over private IP networks, or over the Internet.

The Jabra BIZ 2400 Series features a cascade of improvements that pushes the envelope for the levels of audio quality, comfort and durability necessary for dealing with the special requirements in contact center and office environments.

BETTER AUDIO

Jabra BIZ 2400 IP provides users with an unrivalled audio experience by exploiting the full wideband range (150–6,800 Hz), which is used in professional IP telephony systems. Hand-made Neodymium speakers provide maximum frequency response within this range, resulting in unrivalled call clarity.

BETTER BUILD

The Jabra BIZ 2400 Series is designed to ensure maximum service life and minimum maintenance costs. Key details are made of surgical steel, the cord is re-inforced with Kevlar.

BETTER COMFORT

Jabra BIZ 2400 IP headset is available in mono speaker configuration. And all mono versions offer a choice of 3 wearing styles—earhook, neckband or headband with details that ensure easy adjustment for use on both left or right ear. The headband features a T-bar specially designed to prevent it from getting tangled in your hair.

Jabra BIZ 2400 headsets are also available in narrowband versions optimized for traditional desk phones, and a USB Hi-Fi version for the ultimate IP/multimedia experience.

FOR WIDEBAND TELEPHONY

Jabra

FEATURES AND BENEFITS

FEATURES	BENEFITS
Full wideband audio with frequency response configured to the 150–6,800 Hz range, matching the bandwidth used in professional IP telephony systems	Optimum call clarity resulting in greater comfort and significantly less need to ask customers to repeat themselves
Neodymium speakers provide exceptional sound clarity within the designated frequency response range	Better sound helps users understand what customers are saying, and help prevent irritating misunderstandings
Choice of microphone: <ul style="list-style-type: none">- Standard Omni-directional for quiet work environments- Noise-canceling for noisy work environments	Technology filters out unwanted background noise so customers can clearly hear what users are saying, with less interference and background noise. This makes it possible to provide better customer service. Moreover, there is less need to place users in costly, space-demanding individual cubicles, and less need for sound proofing, etc.
Elegant design in strong materials such as Kevlar® and surgical steel, intended for intensive use by many different employees	Long service life, with a minimum of faults and breakages. This helps avoid productivity losses, saves on equipment purchases, and cuts down on service/maintenance costs
Supersoft ear cushions	Enhances comfort and makes sure the earpieces fully enclose the ear. This helps users hear what is being said more clearly, and there is less distraction from surrounding noise sources
Patented FreeSpin boom in which traditional fixed wiring has been replaced with gold-plated slider contacts	This allows users to rotate the boom freely in both directions, making it quick and easy for users to swap the headset over from one ear to the other. This helps prevent breakages—a key issue in many contact centers and office environments
3-in-1 mono wearing styles: <ul style="list-style-type: none">- Headband- Neckband- Earhook	Provides users with choice of favorite wearing style with speaker on preferred ear for optimum comfort and call clarity. The system makes it easy to swap between the different wearing styles. The headband features a T-bar specially designed to prevent it from getting tangled in your hair
Peakstop™ technology limits sound spikes and sudden loud noises transmitted via the network	Users are protected against acoustic shocks which can result in hearing damage
Extended 3-Year warranty	Protects headset investment by adding a full year to GN Netcom's standard warranty

SAFETY

The Jabra BIZ 2400 meets the electric strength test and impulse test requirements of the international standard IEC 60950-1. It also meets EN 60950, AS/NZS3260 and UL 60950 standards.
