

SonicWALL 3G Solutions

SONICWALL

Businesses Need the Internet

- Today's businesses rely heavily on the Internet
- A reliable network connection is critical
 - Dial backup often used to ensure connectivity
- Some businesses need a secure, manageable connection anywhere

The Retail Single Point of Failure

- Retail customers often use land-line based dial failover
 - DSL to dial failover dependent on a single land-line
 - What happens if the phone line is unavailable (accidents, weather, etc.)
- Broadband primary with 3G failover removes this dependency

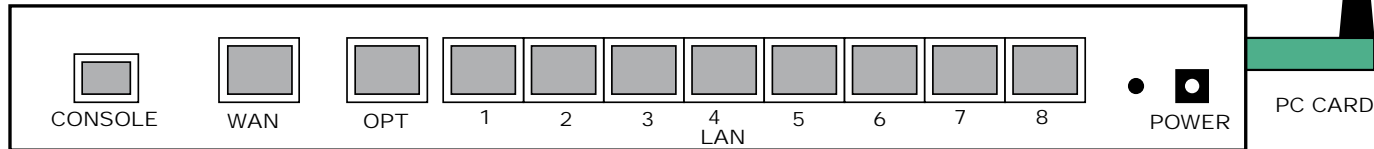

Temporary and Mobile Networks

- Businesses are using the 3G wireless WAN to increase business productivity
 - Tradeshow Internet access
 - Construction sites
 - Emergency response vehicles
 - Disaster recovery
 - Remote telemetry
 - Point-of-Sale systems
 - Digital surveillance
 - Sales Demonstrations
 - Field service
 - Mobile wireless hotspot
 - Shipyards and Ports
 - Airport or street vendor carts
 - Defense / Homeland security
 - Traffic light control

The Problem with Current Products

- Current 3G solutions are not business-class
- Gaps include:
 - Centralized remote management of large networks
 - Comprehensive VPN support
 - True security
 - Integrated deep packet inspection
 - Integrated virus, spyware, worm protection
 - Integrated IPS for attack and intrusion prevention
 - Reporting

The SonicWALL TZ 190

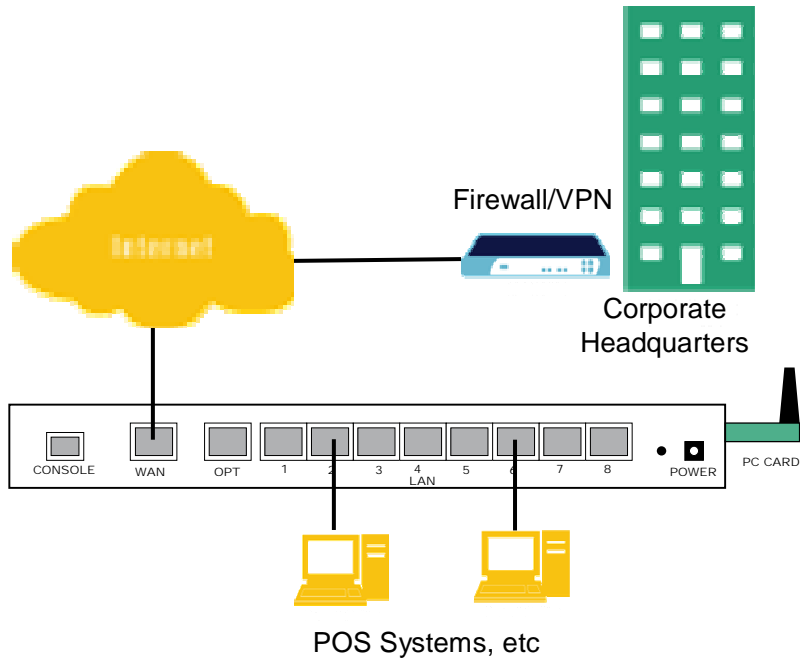

- Flexible PC Card based 3G cellular wireless access
- Support for both GSM and CDMA based 3G networks
- Automated failover and failback
- Powerful deep packet inspection firewall
- Integrated gateway anti-virus, anti-spyware and intrusion prevention
- Intuitive configuration wizards
- Global management and reporting

Customer and Solution Examples

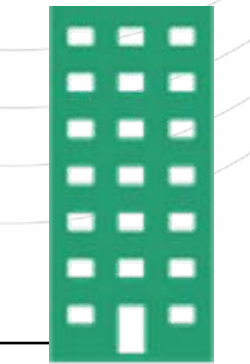

Retail VPN

- Retail stores migrating from dial-up to DSL with cellular back-up
- Can either be fixed store or mobile cart
- Key Features
 - 3G as either back-up or primary
 - Failover/failback technologies
 - Global Management
 - Security

Temporary Networks

Corporate
Headquarters

WWAN Internet
Connection

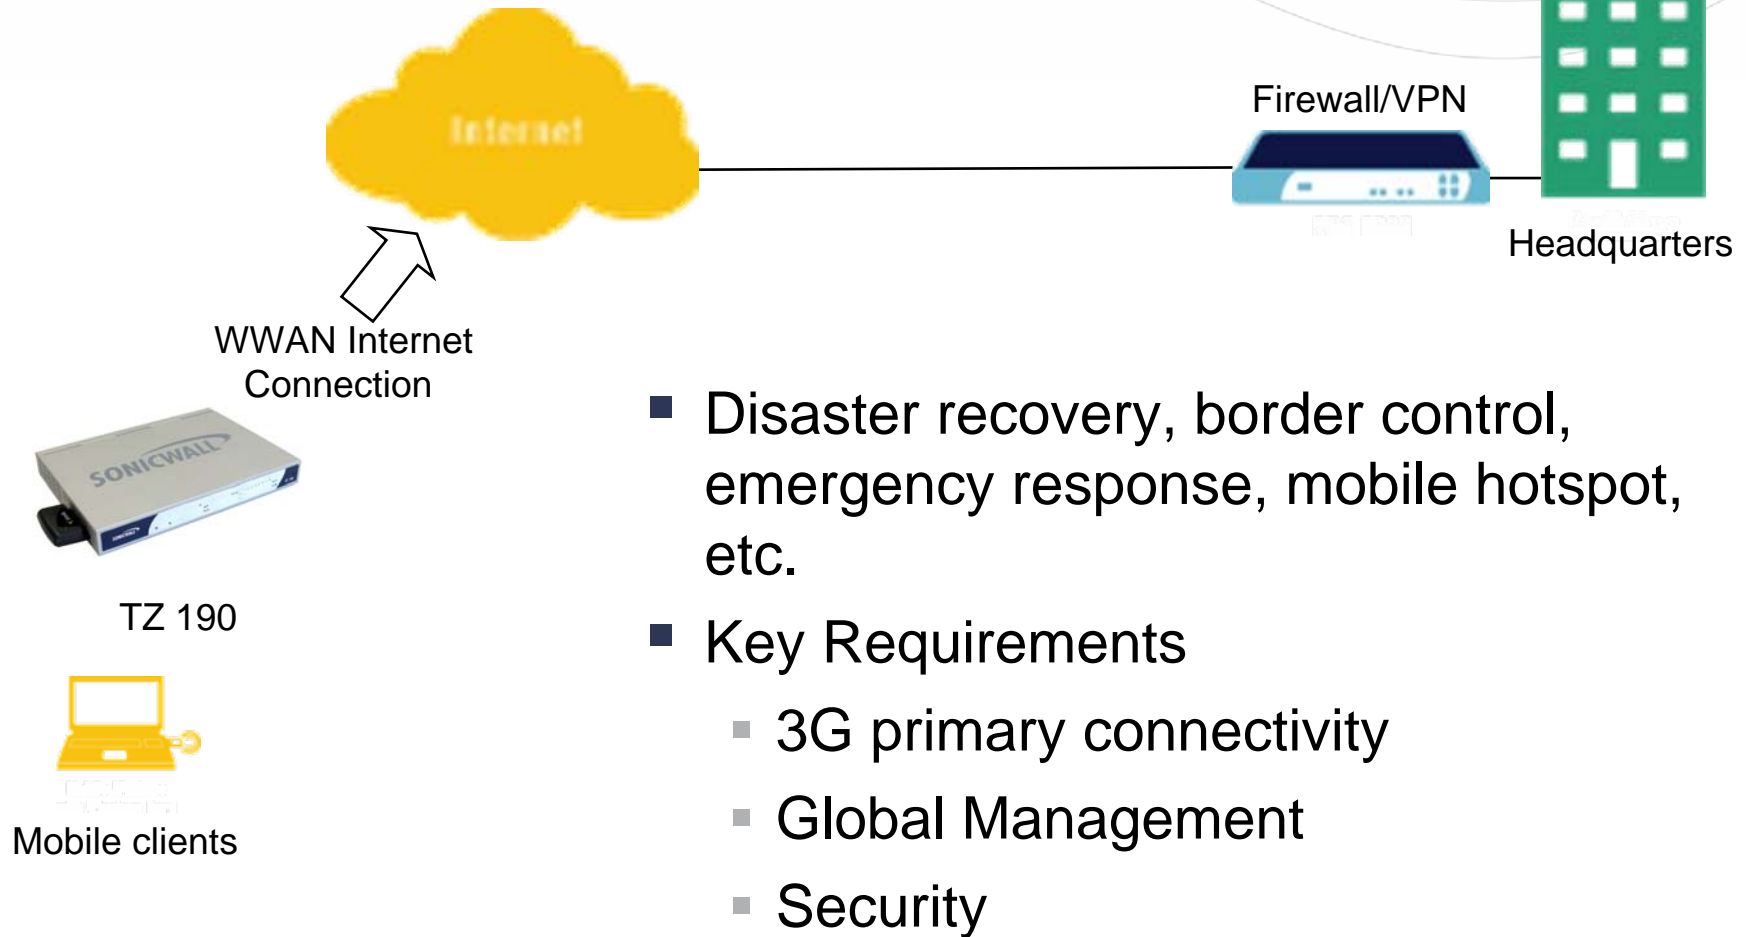

TZ 190

Internet Users

- Trade shows, off-site meetings, construction sites, seasonal stores
- Key requirements
 - 3G primary connectivity
 - Global management
 - Security

Mobile Network

Small Remote Fixed Office

WWAN Internet
Connection (primary)

TZ 190

Network Users

- Small remote offices without DSL options
- Key requirements
 - Deep Packet Inspection firewall
 - Gateway AV, IPS
 - Anti-Spyware
 - Ease of use

New SonicWALL 3G Solutions

- Elimination of the retail land-line single point of failure
- Enablement of mobile and temporary networks
- Complete security and manageability

Thank You
