

SonicWALL CASS 2.0 Partner Brief

FIREWALL

Flexible, full-featured spam defense

The new and improved SonicWALL® Comprehensive Anti-Spam Service (CASS) brings full-featured spam defense to any installation with a current generation SonicWALL firewall. The latest version of the product, CASS 2.0, has numerous feature enhancements, including per-user spam quarantines, robust allow/block list, more flexible junk store deployment options, and LDAP integration.

Value Proposition for Your Business

- Easily implement CASS with the new, simplified subscription service pricing that follows the same model as other SonicWALL firewall services, such as Content Filtering Service (CFS), Comprehensive Gateway Security Suite (CGSS), and Gateway Anti-Virus (GAV), Intrusion Prevention Services (IPS)
- Increase revenues by easily attaching anti-spam services to all new SonicWALL firewall installations
- Deliver a secure messaging solution to your SMB clients by including SonicWALL Comprehensive Anti-Spam with all SMTP server deployments, including Microsoft® SBS or Exchange
- Leverage the rich per-user quarantine and LDAP integration features for simplified ongoing management and support
- Generate additional recurring revenue by renewing CASS subscription services in future years
- Include anti-spam in your managed security offering based on SonicWALL firewalls

Value Propositions for Your Customer

- Eliminate virtually all spam, phishing attacks, and email born viruses
- Improve user productivity and employee satisfaction with per-user spam quarantines
- For do-it-yourself clients, set-up and administration of the solution is fast and easy on any SonicWALL firewall, from the TZ 100 and up
- Rich search and reporting tools help administrators have a complete view of the email defense of the company

Competitive Advantages

- Simplify your comprehensive security offering by delivering networking security and spam defense in a single platform
- Standardize on the most complete spam defense solution that runs on a SonicWALL firewall
- Deliver managed email security services to all of your clients

Qualifying Questions for Your Customer

1. Do you currently have or plan to have your own email server onsite?
2. How important is it to stop all spam, phishing attacks, and viruses from reaching your users?
3. How much will your productivity improve if every user can quickly manage their own spam junk box?
4. Are you aware that your existing firewall can run an affordable and highly effective spam service?
5. How frequently do your users need assistance with lost email or email that may be stuck in your current spam filter?

Pre-requisites to Enable CASS

- Comprehensive Anti-Spam Service is supported on SonicWALL E-Class NSA, Network Security Appliance (NSA) and TZ Series security appliance running SonicOS 5.6.3 or higher
- Installation of Junk Store can be done on any Windows based SMTP server including Microsoft Exchange, SendMail and Lotus® Domino

Product Benefits

- Advanced Reputation Management (ARM) utilizes Sender IP Reputation to reject junk email—including spam, phishing and attached viruses at the connection level
- Cloud-based Advanced Content Management (ACM) removes any remaining junk email using proven SonicWALL spam fighting techniques like Adversarial Bayesian Analysis
- Manage Allow/Block List at people, company and list level to have control over what email gets into your system
- Flexible junk email routing categorizes junk messages as spam, likely spam, phishing, likely phishing, virus and likely virus at user, group and company levels
- SonicWALL Global Response Intelligent Defense (GRID) Anti-Virus is automatically activated along with SonicWALL Comprehensive Anti-Spam Service to detect SMTP-based virus emails
- Provides flexible and robust LDAP server integration for easy and secure user management
- Integrated reporting and logging is built into SonicWALL firewalls
