

CONFIDENCE THROUGH SECURITY

Protection Service for Business is the best, most comprehensive endpoint protection package on the market, designed from the ground up to solve your challenging business security needs.

It protects all your endpoints, from Windows and Mac to mobile devices, against threats like ransomware, data breaches and 0-day attacks, without requiring significant maintenance or management overhead.

Protection Service for Business is the only unified multi-endpoint security solution that comes with integrated Patch Management.

We are proven to provide superior and more consistent protection than our competitors, as verified by independent security experts. Thanks to our pioneering security technologies, such as real-time threat intelligence and advanced machine learning algorithms, we are always one step ahead of the attackers.

COMPUTER PROTECTION

Protection Service for Business provides powerful and modern security for your Mac* and Windows endpoints. With tools like Patch Management and real-time threat intelligence provided through the F-Secure Security Cloud, your security rises to a whole new level. F-Secure Computer Protection for Windows comes in two versions: Premium and Standard.

Supported OS: Windows 7, 8, 8.1, 10 | macOS 10.12, 10.13, 10.14

ADVANCED ANTI-MALWARE

Provides multi-engine detection capabilities. Offers better security than traditional solutions, without being reliant on a single technology.

DEEPCUARD

Offers proactive protection against 0-day malware and exploits through the use of heuristic and behavioral analysis.

DATAGUARD**

Provides additional detection capabilities against ransomware, and prevents destruction and tampering of data.

FIREWALL

F-Secure Firewall uses default Windows engine to execute firewall rules, based on extensive list of advanced rules created by our penetration testers.

SECURITY CLOUD

Our threat analysis and response systems provide our clients with real-time threat intelligence, allowing them to identify and respond to new threats as they emerge.

DEVICE CONTROL

Enables control over USB-based devices, preventing data loss and malware infections via them.

PATCH MANAGEMENT

Blocks up to 80% of attacks by automatically patching Windows and 3rd party software vulnerabilities. Includes options for exclusions and manual updates.

WEB PROTECTION

Prevents access to malicious and phishing sites, blocks malicious scripts and content and provides elevated protection for business critical web activity.

APPLICATION CONTROL**

Blocks execution of applications and scripts according to rules created by our penetration testers, or as defined by the admin.
