

## The Ultimate Password App

### Secure

MYDIGIPASS.COM helps you to secure access to your websites. Adding an additional security device on top of your password protects your online accounts from hackers who want your identity and credentials.

### Easy

One place to access all your websites. MYDIGIPASS.COM provides a launch pad where you can quickly access all your favorite websites. No need to remember the exact url, username and password anymore.

### Everywhere

All you need is a computer, tablet PC or smartphone with an internet connection to safely access your online assets and favorite websites from anywhere, anytime.

## The MYDIGIPASS.COM experience

### Forget your passwords

Simply log on to MYDIGIPASS.COM and access all your favorite sites and online applications without dealing with logins or passwords. Need to update your contact, payment or password information? Store and manage your details on MYDIGIPASS.COM and you are all set.

### Launch pad

MYDIGIPASS.COM is the launch pad to your online life. Use our bookmark feature to organize your favorite websites. We will remember your login information so you don't have to.

### Marketplace

Search our marketplace to find and bookmark the online vendors that use MYDIGIPASS.COM security.

## Maximum Security

### Password independence

How many passwords do you have? MYDIGIPASS.COM saves you from an online experience interrupted by constant logging in/out. Use our launch pad to access all your favorite websites. No need to remember and enter usernames and passwords, or even exact website addresses.

### Personalized security

Protect yourself from identity theft. Passwords simply don't offer the protection you need in this advanced digital age. MYDIGIPASS.COM introduces personalized identification with one-touch, secure access on your smartphone, tablet or PC. However you access the Internet, MYDIGIPASS.COM puts maximum security and convenience into your hands.

## Protect your website with MYDIGIPASS.COM

### Easy integration

Leverage our existing identity infrastructure and experience in securing some of the world's largest banks to expand your business. With more than 100,000,000 DIGIPASS devices deployed in the market today, many leading companies and users already rely on Vasco's proven, strong authentication technology.

### Testing: The Sandbox Environment

MYDIGIPASS.COM provides a full-fledged developer environment. This allows you to investigate the potential and effectiveness of our Secure Login API. No strings attached.

### Start now

To start testing, just sign up on MYDIGIPASS.COM and add developer.mydigipass.com from the marketplace to your website.
