

SONICWALL PRODUCT LINE: AT-A-GLANCE

Next-Generation Firewalls

High End: NSsp 12000 Series NSsp 12800/12400
Uncompromising security, performance, scalability, and visibility

Secure Mobile Access

SMA Series SMA EX9000/8200v/7200/6200/500v/400/200
Simple, policy enforced secure access to network and cloud resources

Web Application Firewall (WAF)

Web application security, data leak prevention and regulatory compliance, on prem or in the cloud

Cloud App Security

SonicWall Cloud App Security is a cloud service that provides CASB-like functionality, delivering real-time discovery, visibility and control of cloud application usage on the network.

Mid-Range: NSa Series

NSa 9650/9450/9250/6650/5650/4650/3650/2650

Fast, proven security against the latest threats for every connection, encrypted or unencrypted

Email Security Series

ESA 9000/7000/5000/VM Software/Hosted Service
A multi-layered solution that protects against advanced email threats

Next-Gen Firewall Subscription Services

Included in Advanced Gateway Security Suite (AGSS); Combined with Next-Gen Firewall in TotalSecure Advanced Edition

- Capture Advanced Threat Protection (ATP) multi-engine cloud-based sandboxing
- Gateway Anti-virus and Anti-spyware
- Intrusion Prevention Service
- Application Control
- Content/Web Filtering Service
- 24x7 Support

Entry Level: TZ Series TZ600/TZ500/TZ400/TZ300/SOHO

Complete wired and wireless security and performance in an entry-level firewall

Management & Analytics

Capture Security Center Global Management System (GMS) Analytics
Control and knowledge of your network is power

Virtual: NSv Series

Virtual firewalls with flexible licensing models to shield all critical components of your public and private cloud infrastructure

WAN Acceleration Series

WXA 6000 (SW) WXA 5000 (VM)/500 (SW)
Significantly enhance application transfer performance and increase employee productivity

Wireless Security

SonicWave Series SonicWave 432e/432i/432o
Security and performance for the mobile network

Capture Client

A unified client platform that delivers multiple endpoint protection capabilities, including advanced malware protection

Security-as-a-Service (SECaaS)

Outsource your network security with our turnkey solution

Inspect Deep Memory

A patent-pending technology, the SonicWall Real-Time Deep Memory Inspection (RTDMI™) engine proactively detects and blocks unknown mass-market malware via deep memory inspection in real time. Available now with the SonicWall Capture Advanced Threat Protection (ATP) cloud sandbox service, the engine identifies and mitigates even the most insidious modern threats, including future Meltdown exploits.

Qualifying Questions

Next-Gen Firewalls

- How do you measure the effectiveness of your security controls?
- What is your remediation plan for identified security gaps?
- How do you reduce the risk of vulnerable web applications your users may access?
- What type of internet connection do you have? What is the speed?
- Do you need to sacrifice performance to get better security on your network?
- What are you doing to protect against new threats like zero-day attacks?
- How capable is your team at patching vulnerabilities within 12 hours of patch release?
- Can your sandbox detect and block threats hidden in deep memory?
- How many engines does your sandbox incorporate?
- Can your sandbox hold the files at the gateway before being released?
- Do you know most web sessions are encrypted, and if your firewall can decrypt and inspect them?
- Do you know whether or not your organization's firewall is inspecting HTTPS traffic?
- Have you had network service disruptions or downtime due to inspecting HTTPS traffic?
- Is your virtual firewall as robust as your physical firewall?
- How are you securing your public or private cloud environments?
- Are you able to implement proper security zoning and micro-segmentation on your virtual network?
- Do you have complete visibility and control of your virtual traffic?
- Does your current firewall integrate PoE/PoE+ support or do you need a switch to power PoE-enabled devices?
- Would you be interested in reducing costs by replacing MPLS with SD-WAN for secure private networking?
- Do you need subscription-based licensing for virtual firewalls?

Capture Client

- Do your endpoints need consistent advanced protection against ransomware and encrypted threats?
- How easily can you enforce policy compliance and license management across all endpoints?
- Do you struggle with the visibility of endpoints and management of your security posture?
- Does your endpoint security product connect to a sandbox environment?
- Does your current solution continuously monitor your system's health?

Web Application Firewall

- How are you currently protecting your business-critical web properties and web servers?
- What security measures do you have in place that help comply with PCI security requirements?

Cloud App Security

- Do you have visibility into the cloud application usage in your network?
- Are you aware of the how much data is being transmitted to risky applications?
- How easily can you enforce control on sanctioned and unsanctioned IT applications?

Wireless Security

- Are your employees/partners/customers complaining about slow Wi-Fi performance?
- What would be the maximum number of wireless users at any one time?
- Do you have concerns about the cost of adding a secure wireless solution into your network?
- How familiar are you with the 802.11ac Wave 2 wireless standard?

Secure Mobile Access

- Is your organization currently moving or planning to move business applications and resources to the cloud?
- Does your organization use SaaS applications such as Salesforce, Office 365 or Concur?
- Do your employees use Dropbox or personal email to share files?
- Are your employees managing multiple URLs and passwords?
- What is your current mobility/BYOD strategy?
- Do you have visibility into every device that is accessing your network?

Email Security

- Are you concerned about advanced email threats such as ransomware, spear-phishing and Business Email Compromise?
- Are you using, or planning to use Office 365 or G Suite for email?
- Does your current email security solution provide Advanced Threat Protection capabilities?
- Are you concerned that emails containing confidential information might be leaked?
- How do you comply with regulations such as GDPR, Sarbanes-Oxley, GLBA or HIPAA?
- Are you interested in offering managed email security services to your clients? (MSSPs)

Management & Reporting

- What problems could you solve by unifying your security solutions under one common management platform with a single-pane of glass experience?
- What economic and operational challenges are you experiencing from managing your security infrastructure?
- How confident are you of your ability to demonstrate cyber-security compliance such as PCI, HIPAA and GDPR?
- How would it change your security posture if you were able to better detect and respond to threats and risks with speed and accuracy?
- What value would you and your leadership team gain from full visibility into cyber threats and risks to your business?

WAN Acceleration

- Does your organization have multiple remote office locations? How many?
- Are the offices networked through either a VPN or dedicated WAN circuit (MPLS) connection?
- Do your employees use apps such as Microsoft Windows File Sharing, SharePoint, Office or FTP?
- Would you like to reduce bandwidth consumption and cost without paying to increase capacity?
