Release Purpose

SonicOS 5.9.0.6 and 5.7.2.1 are maintenance releases that fix multiple LDAP protocol vulnerabilities.

Resolved Issues

The maintenance release resolves multiple LDAP protocol vulnerabilities when SonicOS is configured to use Microsoft Active Directory / LDAP usernames for authentication of members in SonicWALL Administrator Groups.

 **Note:** SonicOS configurations NOT utilizing Active Directory / LDAP for authentication of SonicWALL administrator group members, including **User > Settings** configurations utilizing authentication methods “**Local Users**”, “**RADIUS**”, “**RADIUS + Local Users**”, do not require the maintenance release.

Platform Compatibility

The table shows platform compatibility for SonicOS 5.9.0.6, 5.8.1.15 and 5.7.2.1:

Platforms	Running Version	Upgrade to Version
NSA E-Class E5500 / E6500 / E7500 / E8500 / E8510 NSA 220 / 220W / 240 / 250M / 250MW / 2400 / 3500 / 4500 / 5000	5.9.x	5.9.0.6
