

*"Finally I am able to access my important business documents from anywhere, at any time and I feel secure in doing so,"* Laird Wolfgang Tkocz-Köhler, IT Server and Network, **STORZ MEDICAL AG**.

**STORZ MEDICAL AG** is a long-standing customer of Norman and already has a successful Norman Endpoint Protection solution in use. Due to his interest in the new Norman SecureBox cloud solution he registered for the Swiss business lunch in September 2013. The presentation and live demo convinced him immediately. It did not even take until the end of the event for him to make the decision to buy Norman SecureBox and today he is still using the product with great enthusiasm. It is of particular importance to him to be able to access his business critical files at any time, day or night, be it from his PC or his mobile devices and that these files are encrypted and stored in two European data centres.

"I am very satisfied with Norman SecureBox. It perfectly meets my expectations and I feel very secure accessing the SecureBox. The product is now already installed on 3 computers and I can access my data without any problems as well as share and synchronise it with my colleagues," concludes Laird Wolfgang Tkocz-Köhler, IT Server and Network, **STORZ MEDICAL AG**.
