F-Secure®

RAPID DETECTION & RESPONSE

ACCELERATE YOUR BUSINESS WITH ELEVATE TO F-SECURE

F-Secure Rapid Detection & Response (RDR) has a built-in feature called Elevate to F-Secure, which you can use to forward difficult or complex Broad Context Detections™ straight to our seasoned cyber security experts. We will then conduct a professional analysis into the methods, technologies, network routes, traffic origins and timelines associated with the suspected attack. When you submit an Elevate Request, you can choose from the following two service options*:

Threat Validation — F-Secure will provide additional information about a Broad Context Detection™ discovered during the last 7 days. This includes an expert-written summary and description of the detection, along with any other relevant data to help you determine whether it requires response actions.

Threat Investigation — F-Secure will conduct a highly detailed investigation into a specific Broad Context Detection™, leveraging all recent and historical data. This option also includes actionable incident response guidance from our cyber security experts, along with a comprehensive report of the detected attack type.

BENEFITS

Threat analysis support in challenging situations

Actionable advice on attack containment and remediation

F-Secure experts backing you up at all times

*All additional services need to be agreed upon separately.
