Release Purpose

SonicOS 6.1.1.9, 6.1.2.3, 6.1.1.9-CFS, and 6.1.2.3-CFS are maintenance releases that fix multiple LDAP protocol vulnerabilities.

Resolved Issues

The maintenance release resolves multiple LDAP protocol vulnerabilities when SonicOS is configured to use Microsoft Active Directory / LDAP usernames for authentication of members in SonicWALL Administrator Groups.

 **Note:** SonicOS configurations NOT utilizing Active Directory / LDAP for authentication of SonicWALL administrator group members, and **User > Settings** configurations utilizing authentication methods “**Local Users**”, “**RADIUS**”, “**RADIUS + Local Users**”, do not require the maintenance release.
